Ref: G.O.Ms.No.375 Health Dated: 12.2.1951. Pstg

***

With reference to Para 3 of the G.O.cited above, I have to state as follows:-

The area is being surveyed by the Regional Malaria Organisation, Coimbatore after each spraying season with a view to assess the efficacy of control measures and to make any suggestions, if necessary.

The survey carried out in the village during November 1950 has revealed that:-

a) the spleen rate fell from 58.3% taken prior to the commencement of the operations to 26.0% in November 1950.
b) the parasite rate was nil.
c) the vector anopheline population was considerably reduced.

It may be seen from the above data collected that the Malaria, which was in a Hyper-endemic level has been reduced to moderately endemic level as a result of Malaria control measures adopted during the last two Malaria seasons. At this rate it may be possible to bring down Malaria in the village from the present moderately endemicity level to the healthy level with sprayings etc conducted for two more malaria seasons of 1951-1952.

The necessity or otherwise for continuing the scheme of anti-malaria measures in Kollur Village on the present scale or on a restricted basis can be decided after assessing the results of work by the end of 1952. Till then, I consider it necessary to continue the scheme of temporary anti-malaria measures in Kollur Village sanctioned in G.O.(Ms)No.2586-PH- dated 29.7.1948.

Yours faithfully,

FOR Director of Public Health, Madras.

30163

Ref: Telephonic Message dated 11-6-1951 from the Assistant Secretary to Government, Health Department, MADRAS.

As stated in this office letter R.No.15848-Mal(2)/51 dated 26-3-1951, it is necessary to continue the scheme of anti-malaria measures in Kollur village till the end of the transmission season of 1952, i.e., till 30th June, 1952, the season being from January to June. The District Board, South Kanara, has agreed in its resolution No.72 dated 19-5-1951 to continue the scheme during 1951-52. Sanction is necessary for the continuance of the scheme till the end of June 1952, since the close of the financial year 1951-52 comes in the middle of the transmission season of malaria in that area, and the work once started has to continue till the end of the transmission season.

Yours faithfully,

P. Padmanaban 16/6

Malaria Kollur village - Coondapur Taluk (South Kanara district) - Antimalarial measures - Continuance of -

From the D.P.H. R. No 15848-Mal(2)/51 dated 26.3.51
R No 28805/Mal(2)/51 dated 28.5.51

Please see the letters from the D.P.H at pp 1 and 9 cf.

When according sanction to the payment to the South Kanara district board of a grant of Rs 152-14-0, being the one third of the actual expenditure on the antimalarial scheme carried out by the Dt Bd during 1949-50, in Kollur village, Coondapur taluk, the D.P.H was asked to state how long the scheme of temporary antimalarial measures sanctioned in GO No 2586 P.H dated 29.7.48 should be continued in the village. The D.P.H. now states that the necessity or otherwise for continuing the scheme of antimalarial measures in Kollur village on the present scale or on a restricted basis can be decided after ascertaining the results of work by the end of 1952. Till then, he considers it necessary to continue the scheme. The Dt Bd also is in favour of continuing the scheme during 1951-52. In the circumstances the recommendation of the D.P.H may be approved.
